

1. About EFMI

The European Federation for Medical Informatics Association (EFMI) is the leading organisation in medical informatics in Europe and represents 32 countries. EFMI is organized as a nonprofit organisation concerned with the theory and practice of Information Science and Technology within Health and Health Science in a European context.

2. Special Topic Conferences

Special Topic Conferences are conferences, specialized in current topics. STCs follow a successful concept including the following components:

- Organisation by a member society in arrangement with its annual meeting
- Topic defined to the needs of the member society
- Relevant EFMI Working Groups are engaged for the content
- Contributions on invitation and by open call for papers
- Small 2-day conference with 100+ participants

3. What is the Conference about?

The conference is focused on topics including (but not limited to):

- Architectures and ICT tools for health science research (e.g. EDCS, CTMS, RDR)
- Interfaces with diagnostic or therapeutic systems (e.g. HIS, LIS, PACS)

- Electronic support in systems and precision medicine
- Integration of genome, phenome and exposome data for research
- ICT systems supporting translational research and medicine
- Data standards and ontologies (e.g. ODM, BRIDG, FHIR)
- Open metadata and automatic parsing
- Data provenance and stewardship
- Big data analytics
- Electronic phenotyping
- Mobile data capture and electronic patient reported outcomes (e.g., ePRO)
- Data quality, privacy, and security, as well as consent management
- Anonymization and de/re-identification
- Data liberation and reuse, serving both research and care

4. Why sponsoring the STC EFMI Conference?

- Be part of a leading conference in medical informatics in Europe
- Get in touch with cutting-edge research that can transform your business
- Find new partners and like-minded professionals from research and industry
- Reach your target audience in an efficient manner
- Advertise products to the decision makers of tomorrow in the growing field of medical informatics

5. Further Information
